

Emmanuel Mukolwe Shikanda

Full-stack Software Engineer | [Java-script](#)

Nairobi, KE | +254 707 215 959 | shikandemmanuel@gmail.com | [GitHub portfolio](#)

Junior Web Developer with hands-on experience building responsive websites and interactive web applications. Skilled in **HTML, CSS, JavaScript, jQuery, Node.js, Express.js, REST APIs**, and **Git & GitHub**, with a solid understanding of both front-end and back-end development. Currently expanding skills in **React and database development** while building practical full-stack projects.

AREAS OF EXPERTISE

HTML5 • CSS3 • JavaScript (ES6+) • jQuery • Node.js • Express.js • REST APIs • JSON • AJAX • React (learning) • Git • GitHub • Responsive Design • Cross-browser Compatibility • Front-End Development • Back-End Basics • Full-Stack Development • Debugging • Problem-solving • Teamwork • Continuous Learning

KEY ACHIEVEMENTS

Responsive Web Projects: Built and deployed multiple responsive websites using HTML, CSS, and JavaScript — applying mobile-first design principles and Flexbox/Grid layouts to ensure seamless cross-device experiences.

API Integration: Developed interactive web applications that consume REST APIs using AJAX and JSON — handling async data fetching, dynamic DOM updates, and error states for real-world usability.

Back-End Foundations: Built server-side logic using Node.js and Express.js — creating RESTful endpoints, handling HTTP requests, and connecting front-end interfaces to back-end services.

TECHNICAL PROJECTS

Responsive Portfolio Website | Personal Project | 2025

- Designed and developed a fully responsive personal portfolio using HTML5, CSS3, and JavaScript — applying Flexbox and Grid to ensure consistent layouts across all screen sizes and browsers
- Implemented interactive UI elements using JavaScript and jQuery — smooth scrolling, dynamic content loading, and animated transitions for an engaging user experience
- Managed the project entirely on GitHub — maintaining clean commit history, branching, and version control throughout development

REST API Web Application | Personal Project | 2025

- Built a dynamic web application that fetches and displays live data from a public REST API using AJAX and JSON — handling async requests, loading states, and error responses
- Structured front-end code using modular JavaScript (ES6+) for clean, maintainable, and reusable logic across components
- Tested cross-browser compatibility across Chrome, Firefox, and Safari — debugging layout and rendering inconsistencies using browser DevTools

Node.js & Express.js Backend Server | Learning Project | 2025-2026

- Built a lightweight REST API server using Node.js and Express.js — defining routes, handling GET and POST requests, and returning structured JSON responses
- Connected a simple front-end interface to the Express.js backend — enabling full end-to-end data flow and gaining practical full-stack development experience
- Currently expanding this project to include database integration and React front-end, working toward a complete full-stack application

EDUCATION

Zetech University | Nairobi, Kenya

Diploma in Computer Science — May 2025 – Ongoing

Cisco Networking Academy | Online

SKILLS SUMMARY

Front-End: HTML5 • CSS3 (Flexbox, Grid) • JavaScript (ES6+) • jQuery • Responsive Design • Cross-browser Compatibility

Back-End: Node.js • Express.js • REST APIs • JSON • AJAX • HTTP methods

Currently Learning: React • Database development (SQL/NoSQL) • Full-Stack architecture

Tools: Git • GitHub • Browser DevTools • VS Code • Postman (API testing basics)
